Total number of species and subspecific taxa = ca. 1199

About 100 taxa are homotypic synonyms; so the total is 1199-100= 1099.

Total number of putative endemics=492 (minus ca. 50% of homotypic synonyms) = 442

442/1099=40.2% (40% of the taxa were described from Indonesia)
